Menu Update Instructions for Doña Malena Website

File Structure

- `index.html` - Current website with existing menu
- `new.txt` - Contains new menu items organized by sections

Required Actions

1. Complete Menu Replacement

- Remove **ALL** existing food and drink items from the HTML file
- Clear out all current menu entries completely

2. New Menu Implementation

- Parse the `new.txt` file for new menu items and prices
- Add all items from the `new.txt` file to the HTML
- If there are more items than before, add additional menu item blocks
- If there are fewer items than before, remove excess menu item blocks
- Maintain the exact same HTML structure and styling for each menu item

3. Section Organization

- The `new.txt` file uses `header:food` and `header:drinks` to separate sections
- Place **ALL** food items first in the menu
- Add a "Bebidas" section header (with the existing green styling) after all food items
- Place **ALL** drink items under the Bebidas section

4. Preserve Existing Sections

- **KEEP** the green informational section that appears after the Bebidas section (contains meat types, Wednesday specials, weekend specials, etc.)
- **KEEP** the PWA installer section at the bottom of the page
- Do **NOT** remove or modify these sections

5. WhatsApp Integration

- **ALWAYS ask me for the WhatsApp phone number** before making any changes
- Update the phone number in the `proceedToOrder()` function

- Use format: `5219988467737` (include country code)

6. Maintain Functionality

- Preserve all cart functionality
- Keep all JavaScript functions intact
- Maintain all CSS styling
- Ensure each new menu item has proper `onclick` handlers for the cart system
- Use unique IDs for each menu item in the cart functions

Expected Output

- Updated HTML file with new menu items
- Proper section organization (Food → Bebidas → Green Info Section → PWA Installer)
- Working cart system with new items
- Updated WhatsApp phone number

Important Notes

- Do **NOT** modify the restaurant info, hours, or styling
- Do **NOT** change the overall layout or design
- Only update menu items and WhatsApp phone number
- Preserve all existing functionality and sections

Final Step

Please confirm the WhatsApp phone number before proceeding with the update.

Sample new.txt Format

```
header:food
Empanadas con carne          $8
Empanadas con Q.hebra         $10
Panuchós            $18

header:drinks
Coke Lite 600ml        $30
Pepsi light        $35
```

Instructions Summary

1. Ask for WhatsApp phone number

2. Remove all existing menu items

3. Add all new items from new.txt file

4. Organize: Food items → Bebidas section → Green info → PWA installer

5. Preserve all functionality and styling

6. Test cart system with new items
